

Mitsubishi Electric Thai Foundation, Power of Volunteering

Mr. Poramin Wongsuwat (in the middle), Deputy Director General, presided and attend the tree-planting activities, weir building activities, and trash-recycling activities. Mr. Takeshi Oshima (fourth from the left), Vice Chairman and Mr. Hiroaki Kondo (first from the right), Vice Chairman attended the activities and led the team of over 500 employees from 11 companies under Mitsubishi Electric Group to do tree-planting activities on the area over 30 Rai. This project is called “**Support Local Forest to Reduce Global Warming Association**” which has been conducted for the second year. It is the collaboration of 3 parties, Mitsubishi Electric Thai Foundation, Thailand Greenhouse Gas Management Organization (Public Organization) , and Ban Nong Muang Community Forestry Committee, aiming to establish conservative mindset about national resources conservation and serving Mitsubishi Electric Group’s purpose “Changes for the Better”. The purpose does not focus on the locals supporting only, but also on environmental development that will lead to sustainable changes, as well as support community forestry operations for maximum benefits. The activities happened recently at Ban Nong Muang Community Forestry, Rayong Province.
